Hosted

Korea Electric Vehicle User Association

The Korea Electric Vehicle Users Association will protect the rights and interests of electric vehicle users and contribute to improving the environment for using electric vehicles by developing policies and technologies and preparing various measures necessary to activate the spread of electric cars.

Our Goals

Protecting EV users' rights

We are committed to protecting the rights of electric vehicle users.

Improving the EV experience

We enact pro-charging laws to make the world a better place for electric vehicles.

Outreaching on EV adoption

We create a better charging experience with charging etiquette campaigns and safety training.

Optimizing EV charging infrastructure

We contribute to optimizing charging infrastructure through campaigns to improve the charging experience.

What is KEVUA?

The Korea Electric Vehicle Users Association is a non-profit, private organization, once known as Evuff, an electric vehicle user-led forum and organization. It is also a Ministry of Environment-licensed enterprise.

Having been reborn as the Korea Electric Vehicle Users Association, we will continue to fulfill our public interest roles and responsibilities in protecting the rights and interests of electric vehicle users and revitalizing private dissemination. We pursue acting as a bridge between the government and local governments, related industries such as electric vehicle manufacturers and charging services, and consumers.

What do we do?

We represent the voice of EV users in various national policies related to EVs and contribute to creating a better environment for EVs by cooperating with the Ministry of Environment, Ministry of Trade, Industry and Energy, Korea Energy Agency, Seoul Metropolitan Government, Jeju Special Self-Governing Province, and other local governments.

In addition, since 2017, we have been conducting the 'EV Charging Environment Improvement Campaign' every year with the Ministry of Environment, Ministry of Trade, Industry and Energy, and private charging companies to expand the culture of using healthy charging infrastructure.

How to join the Association

After signing up on the association's website, please contact us with the KakaoTalk ID 'kevua4u'; we will help you become a full association member. A membership fee of 20,000 won is required to become a full member.

For corporate membership, please contact us using the information below.

Account to pay
